SAMplicity 365 Lite

Microsoft 365 has become the de-facto standard for office applications. However, most organisations are failing to get the maximum return on their investment against an extensive range of subscriptions. In tests, many organisations can obtain up to 50% improvement on usage/efficiency.

Whilst compliance is less of a worry with SaaS (Software as a Service), over-provision has become the greatest risk with regards to Software Asset Management.

With our SAMplicity 365 Lite service, you can quickly identify:

- Unused/inactive accounts for re-harvest/true-down
- Subscribers aligned with the wrong subscription/suite
- Duplicate user provisions against multiple tenancies
- Poor product adoption across the business
- Training requirements for users not using full functionality

Whilst the reports are anonymised, you still get valuable indicators to the above and along with it, financial motivation for the business to continue with a production version of the service. An ROI prediction if you will.

This all takes less than 30 minutes to set up and is 100% free of charge, with no small print. This is a great service to do before any renewals or post mergers and acquisitions. Or simply as a validation that internal procedures are working, especially for your leavers and joiners processes!

And if you like what you see and want to see more, we are positive you will find our full SAMplicity 365 services surprisingly affordable.

A FREE health check of your Office 365 setup?

What have you got to lose?

There is no harm in looking!
