

# SAMplicity 365 Premium

Effectively managing your Microsoft 365 subscriptions can be challenging. Whilst Microsoft provide reports that are packed full of information, it is never 100% clear which ones are best to pull, and which fields can be trusted.

With EasySAM's SAMplicity 365 services (powered by [Smarter365](#)), all the relevant information is pulled and collated into clear workspaces for you. Our Premium service includes:

- ◆ A validation exercise against an unlimited number of user-aligned databases
- ◆ A duplication report (that highlights users with account feature/email domain duplication)
- ◆ Procedure building process & communication templates
- ◆ An actions logs project managed courtesy of EasySAM
- ◆ Our [SAMplicity MOT](#) service, providing a high level review of your SAM policies, processes and lifecycle

This ROI centric service is designed to be low-impact on your time. You'll be given a potential ROI figure at the beginning of the project; and then a delivered ROI figure at the conclusion.

You'll be able to quickly identify:

- ◆ Unused/inactive accounts for re-harvest/true-down
- ◆ Subscribers aligned with the wrong subscription/suite
- ◆ Duplicate user provisions against multiple tenancies
- ◆ Poor product adoption across the business
- ◆ Training requirements for users not using full functionality

*If you require something outside of Microsoft 365, please take a look at our [SAMplicity One](#) and [SAMplicity Plus](#) services.*
