

SAMplicity 365 Pro

Effectively managing your Microsoft 365 subscriptions can be challenging. Whilst Microsoft provide reports that are packed full of information, it is never 100% clear which ones are best to pull, and which fields can be trusted.

With EasySAM's SAMplicity 365 services (powered by Smarter365), all the relevant information is pulled and collated into clear workspaces for you. Our Professional service includes a **validation exercise** against an unlimited number of user-aligned databases, a **duplication report** (that highlights users with account feature/email domain duplication); plus access to our **process & communication templates** to build your procedures with and an **actions logs project** managed courtesy of EasySAM. All of these will help you to quickly identify:

- ❖ Unused/inactive accounts for re-harvest/true-down
- ❖ Subscribers aligned with the wrong subscription/suite
- ❖ Duplicate user provisions against multiple tenancies
- ❖ Poor product adoption across the business
- ❖ Training requirements for users not using full functionality

This ROI centric service is designed to be low-impact on your time. You'll be given a potential ROI figure at the beginning of the project; and then a delivered ROI figure at the conclusion.

If you require something more comprehensive, please take a look at our Premium variation of the service.
