EASYSAM

SAMplicity MOT

Once a year you take the time to MOT your vehicle(s), assets which are simply indispensable. So why wouldn't you take the time to get a check up of other valuable assets, like software?

Our SAMplicity MOT is designed to not only give you insight into your SAM Processes & Procedures, but also into your SAM programme and strategy as a whole.

During the project, you'll receive the following deliverables:

- Inventory Data Review
- SAM Strategy Review
- Process & Procedure Review
- Management Report
- Entitlement Accuracy Review
- SAM Scoring & Improvement
- Gap Analysis Report

The service is designed to be low impact, light touch and cost effective. Usually taking just a couple of days to complete and providing some very valuable insights to help you focus your efforts, a MOT of your SAM space has never been easier.

◇ Have you invested in a SAM tool that isn't delivering all that it promised?

A professional review of the tool and data therein could help make some key business decisions moving forward.

◇ Or are you just beginning your SAM journey and don't know where to start?

Let us help you scope and plan. We can help with anything from training, to tool selections, to populating systems. There's no job too small or a question too silly for us at EasySAM.

We're always here to assist you with SAM policy and process documentation; aided by expert guidance that helps you become more proactive when it comes to your assets (and money!).
