

# SAMplicity Training

## Overview

Our Software Asset Management (SAM) training is designed to help you gain understanding and competence in this continually evolving field. Although the training is flexible and can be custom built to suit your needs, you can expect to cover the standard aligned practices, processes and challenges pertaining to SAM; as well as foundation training in licensing.

## Who should attend?

All of our courses will benefit those who are looking to gain a comprehensive understanding of the key aspects of software asset management. Most importantly, those with responsibility for the management and control of software assets, including software licensing and compliance.

## How many can attend?

We can typically cater for up to 10 participants, with the option for the training to be delivered onsite or online.

## How long is the training?

Our most popular course takes 2 full days, or the equivalent in shorter online sessions. This includes not only standard classroom training, but exercises, mock exams and group discussions as well.

## When is the next course?

All of our scheduled training courses can be found on the [Events](#) page of our website. For a bespoke course, please get in touch with one of our friendly team.

**Our courses can be tailored to cover a variety of modules, including:**

- ◆ An introduction to SAM
- ◆ The importance of SAM
- ◆ Challenges of applying SAM
- ◆ Software licensing essentials
- ◆ Understanding entitlement
- ◆ Managing asset inventory
- ◆ Asset reconciliation
- ◆ Asset usage
